Re: Malvern TCE Superfund Site, Domestic Well Assessment &
Management Plan

Dear Mr. Balderston:

As you know, pursuant to the RCRA 3008(h) Administrative Order on Consent ("Order"), you are subject to the requirements of the Domestic Well Assessment and Management Plan (dated 1 August 1993) amended by EPA comments contained in a letter to you dated September 20, 1993.

In order to clarify the sampling requirements of the amended Plan I have prepared the attached tables which outline the sampling frequency or filter change frequency required for each residence. Please review the lists I have prepared for accuracy. Additionally, please provide the date of the most recent sampling event or filter change for each residence identified.

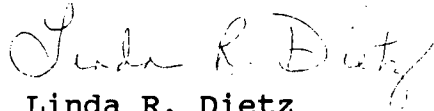

In addition, specific information regarding the Domestic Well Assessment & Management Plan was requested from you in EPA's September 20, 1993 letter. To date, I do not have a record of a response. Accordingly, please provide the following information:

- 1) Manufacturer's information regarding the absorption capacity of the AquaPure filters .
- 2) Identify the number of residents using well #9.
- 3) Provide referenced survey method. Identify on a scale drawing the exact area surveyed and locate the wells identified. Provide the name and address of the wells that have been located.

Should you have any questions please contact me at (215) 597-6906. Legal questions can be directed to Jean Kane, Assistant

Regional Counsel, at (215) 597-6779.

Sincerely,
